Subj: The Best Protection from CORONA VIRUS

Hello,
True Story! I was at my local convenience store last night and a lady walked in looking for hand sanitizer.

The store was completely out of its entire stock of sanitizer in just one day! Once the word got out about a person in Kirkland that died from CORONA VIRUS everyone started to take action.

Many schools are closing to deep clean everything possible. The more sanitary our environment the safer we are from this virus but this is not the best protection..

People are taking many precautions but most of them are not as helpful as they think. Face masks are being bought by the thousands but did you know the CDC says they are ineffective. The virus travels through and around these masks.

Hand sanitizer is also not very effective. Washing hands costs almost nothing and has been proven by research to be even more effective than sanitizing lotions.

The biggest problem is that the virus is AIRBORNE traveling through the air we breath. The symptoms at the beginning are often minor. A person can be infected and does not know it and neither will you.

Of course there are no guarantees but you can protect yourself from the virus and many other diseases in the AIR by keeping the air fresh in your home and business.

I recommend a very advanced and proven machine that actually kills virus's and bacteria as well as mold, mildew, and almost every contaminant in the air.

This machine will kill the CORONA VIRUS before it infects you. If some one comes into your home infected this machine will kill the virus if it enters the air.

It uses four advanced methods in one unit to kill and remove all airborne contaminants:

Needlepoint Ionization
Scalable Purification
Advanced Photo Catalytic Oxidation
Electrostatic Filtration
and can clean the air in an ENTIRE HOUSE up to 3,000 square feet so there's no need for most people to have more than one machine.

With most machines you would need one in literally almost every room.

They are such a great value considering all the benefits and since only one to two are needed but I do recommend one for your business.

Tell the boss about this. One should be purchased for every business. Imagine if everyone had one at their homes and businesses the CARONA VIRUS would be almost dead in its tracks and most people would be protected from everything else as well like the common cold and Flu.

We received a SPECIAL DEAL on these air purifiers / cleaners and can pass on the savings to you.

IF you want to have literally the best protection for you and your family I strongly suggest purchasing one of these machines.

They are not very expensive considering they can clean the entire house and keep you from getting sick. They will protect you and your family not just this year but every flu season.

And there are no filters to change and almost zero maintenance. Just plug it in and in minutes your entire home is a SAFE ZONE.

Go to <https://mytriadaer.com> for more information,

We have 10 units on order coming to the office tomorrow and 4 have already been spoken.

IF you would like one please call immediately and purchase how ever many you need. We will put your name on it and put it aside for you.
